OVERVIEW

- With a solid foundation in Computer Science, I am enthusiastic about expanding my practical skills and acquiring valuable experience within a dynamic business environment.
- I am highly motivated to engage in a professional setting where I can continuously learn, embrace emerging technologies, and make meaningful contributions to the organization's success.

EDUCATION

Ton Duc Thang University - Ho Chi Minh city   **September 2020 - Present**

- Senior student majoring in Computer Science.
- Specialized major: Computational Intelligence.
- Courses: Object-Oriented Programming, Data Structures and Algorithms, Mobile Apps Development, Massive Data Analytics and Processing, Machine Learning, Natural Language Processing.

LANGUAGES AND TECHNOLOGIES

- Programming Languages: C++, Java, JavaScript, PHP, HTML/CSS, C#, Python, SQL.
- Web and Applications: .NET, Laravel, Spring Boot, Android.
- Others: Git, Jupyter Notebook, Data Analysis.

PROJECTS

Fake News Analysis with Transformers   **June 2024 - Present**

- Research project as part of the combined 4+1 undergraduate and master's program at TDT University.
- Collecting both real and fake news articles and posts from social media for detailed data analysis.
- Utilizing **BERT**, **RoBERTa**, and **PhoBERT** models for training and performance evaluation.
- The model achieved over 90% evaluation performance and is currently being developed further to include sentiment analysis of comments and image processing.
- Technologies used: **Python**, **Selenium**, and **Transformers** library.

Cinema Ticketing System   **February 2024 - June 2024**

- Personal project to develop a movie management and booking website **based on CGV Vietnam's site**.
- Utilized **ASP.NET**, **MVC** architecture, and **Entity Framework** for efficient project management.
- Developed a fully functional site for managing cinema clusters, movies, booking functionality.
- The system simulates showtime selection, seat map viewing, seat selection, and ticket booking.

Real-time Weather Forecast Website   **May 2023 - July 2023**

- Team project with 4 members at **Grab Vietnam's Tech Bootcamp 2023.**
- Using **Agile and Scrum** methodologies, the team completed the project on schedule.
- Took responsibility for designing and developing the frontend using **HTML/CSS** and **JavaScript**.
- Utilized **Spring Boot** to create **RESTful APIs**, handle frontend requests, and integrate with the database managed by the data processing team.

Others   **2022 - 2023**

- My Money: An Android app for managing income and expenses.
- Online Clothing Store: An e-commerce website for selling clothing.
- Football Field Rental Manager: An application for managing football field rentals and related services.

CERTIFICATIONS AND OTHER ACTIVITIES

- AI CHALLENGE 2024 organized by Department of Information and Communications of HCM City.
- VIETNAM DATATHON 2023 - Career orientation in Data Science and Artificial Intelligence.
- Agile Development and Scrum Framework course 2022 organized by Techbase Vietnam.
- Skills Courses: Critical Thinking, Team Building and Leadership, Kaizen & 5S, Self-Learning,…
